

Integrating CTS into the CTSA Visiting Scholar Grand Rounds

Transdisciplinary Approaches to Mitigate Persistent Inequities in Quality and Outcomes of Health Care for People with Disabilities

Carol Haywood, PhD, OTR/L

KL2 Scholar

Northwestern University

Feinberg School of Medicine

This presentation will discuss under recognized health care disparities experienced by people with disabilities in the United States, highlighting findings from studies that examined patient and physician perspectives to understand barriers to equitable care. Dr. Haywood will also discuss opportunities to advance health care equity for people with disabilities, including the use of human-centered design and implementation science approaches to develop pragmatic and effective interventions.

Carol Haywood, PhD, OTR/L, is a research assistant professor in the Department of Medical Social Sciences and the Center for Health Services and Outcomes Research at Northwestern University Feinberg School of Medicine. She has been funded by the Patient Centered Outcomes Research Institute (PCORI), the American Occupational Therapy Foundation, and the Craig H. Nielsen Foundation. With support of her KL2 at Northwestern University, she is examining health care access and participation for people with mobility-related disabilities and validating concepts for measures of health care quality. Her work is driven by a vision of health care that facilitates equity for people with disabilities.
