

Ethics, Regulatory and Study Implementation for Research Involving Human Subjects

May 8, 2019

8:00 am to 4:30 pm

This advanced course is designed for research staff interested in enhancing their competency in the field of clinical research. Each module will consist of didactic material and a hands-on training exercise.

Register today by going to www.wp4r.org/crc or www.WePartner4Research.org/CRC.

The training is free. Registration required. Breakfast and a light lunch will be provided.

Course Objectives

Conducting research is a life-long experiential learning process. The course objectives will:

- Provide advanced training in the methods and conduct of clinical research.
- Provide a blended-learning approach including hands-on that will enable the research staff to participate.
