

MHRI-GHUCCTS Monthly Statistical Seminar Series 2023-2024

Friday, January 19, 2024
12 - 1 PM EST | Online

Meta-Analysis

In this session, we will discuss methods for combining results from published studies as well as combining data sets from different sources. The main purpose of meta-analysis is to estimate effects on outcomes from several studies with small sample size. A major concept to discuss is the difference between fixed and random effects. We will discuss the major issues and problems of meta-analyses as well.

Paul Kolm, PhD

Associate Director, Center for Biostatistics, Informatics, &
Data Science (CBIDS), MedStar Health Research Institute
