

MHRI-GHUCCTS Monthly Statistical Seminar Series 2023-2024

Friday, Sept. 15, 2023
12 - 1 PM EST | Online

General Linear Models

In this session, we will discuss statistical analyses for continuous outcomes where the relationship between the outcome two (or more) variables is linear. In these analyses, the outcome is assumed to be normally distributed. We will look at testing the assumptions of normality and linearity and what to do if assumptions are violated. We will also look at linear methods to assess non-linear relationships.

Paul Kolm, PhD

Associate Director, Center for Biostatistics, Informatics, & Data Science (CBIDS), MedStar Health Research Institute
