# MHRI-GHUCCTS Monthly Statistical Seminar Series 2021-2022

Friday, April 15, 2022
12 - 1 PM EST | Online

Linear and Non-linear Models

Linear regression models are commonplace in published research studies. However, when a graph of the data is included, it is obvious that the relationship(s) would be better modeled as non-linear. This session will consider methods for determining whether a model should be linear or non-linear and methods for developing a non-linear model.

Paul Kolm, PhD

Associate Director, Department of Biostatistics and Biomedical Informatics, MedStar Health Research Institute
