

MHRI-GHUCCTS Monthly Statistical Seminar Series 2020-2021

Friday December 18, 2020
12 - 1 PM EST | Online

Analyzing Time-to-Event Data

Paul Kolm, PhD

Associate Director, Department of Biostatistics and
Biomedical Informatics, MedStar Health Research Institute

Time-to-event data has two outcomes, a dichotomous event (e.g., survive, yes or no) and the time to that event. We will examine the basic method and then consider more complex methods including proportional hazards regression, competing risks, multiple events and multistate models.
