

MHRI-GHUCCTS Monthly Statistical Seminar Series 2020-2021

Friday February 19, 2021
12 - 1 PM EST | Online

Bayesian Analysis: Alternative to Frequentist Analysis

Paul Kolm, PhD

Associate Director, Department of Biostatistics and
Biomedical Informatics, MedStar Health Research Institute

So far we have looked at statistical methods from the frequentist perspective. At this webinar we will look at statistical methods from the Bayesian perspective. The Bayesian perspective has been around for over 300 years, but not until the advent of high speed computing has it become useful for more complex research designs. We will compare frequentist and Bayesian perspectives, and then provide some examples of the application of Bayesian statistics.
