

Clinical and Translational Research Grand Rounds: “Big Data, Artificial Intelligence, Precision Medicine”

Speaker: William S Weintraub, MD

Dr. Weintraub is Director of Outcomes Research at the MedStar Heart and Vascular Institute and Professor of Medicine at Georgetown University. Over the past 40 years, with continuous peer-reviewed support, he has contributed to translational, outcomes and quality research including large scale registries, randomized clinical trials, comparative effectiveness and contributions in epidemiology, health disparities, health care economics, regulatory science and guidelines development. His research has resulted in >600 publications, including many which have directly influenced clinical practice and health policy.

This clinical and translational research talk, with implications for clinicians and investigators across disciplines, will share Dr. Weintraub’s important work advancing the incorporation of new data sources and types, new methods, and new care constructs to change practice and improve health.

Friday, September 4, 2020
Presentation: 12pm – 1pm

Please note that this month’s talk will only, for obvious reasons, be streamed online. The accompanying lunch and wine-pairing will have to be of your own making.

Research Grand Rounds are sponsored by the Georgetown-Howard Universities Center for Clinical and Translational Science (GHUCCTS) and MedStar Health Research Institute to bring together our diverse clinical and research communities to share impactful new research that spans disciplines and stages of translation to improve individual and community health.
