

Talking with Strangers: Transformative Science Communication

Whether you're presenting to a room of 500 at a conference or you bump into a potential collaborator in the elevator, every time you talk about your work, it should be the beginning of a conversation—in the best case, one that leads to something actually happening.

In this interactive workshop, you will:

- Understand basic techniques for making your presentations work
- Apply those techniques on the spot by creating at least one elevator pitch
 - Practice revising and presenting what you've written
- Learn how to initiate productive — even enjoyable — conversations with new collaborators

Limited number of 1:1 coaching sessions available at the end of each workshop:
Advance registration is required.

Guest Speaker:

Brian Sostek is an award-winning educator and nationally recognized expert in science communication whose work uniquely integrates evidence-based communication methods with techniques from the performing arts to address the specialized needs of clinical and translational researchers.

TUESDAY, March 24, 2026 12 PM - 4 PM*

WEDNESDAY, March 25, 2026 9 AM - 2 PM**

*Lunch provided

** Breakfast & Lunch provided

Locations:

GUMC Warwick Evans Conference

HU Louis Stokes Health Sciences Library
