MHRI-GHUCCTS Monthly Statistical Seminar Series 2020-2021

Friday May 21, 2021
12 - 1 PM EST | Online

The Tableau Basics: How to Visualize COVID-19 Surveillance Data

Christian Boxley
Senior Research Associate
MedStar Health National Center for Human Factors in Healthcare

Finding and communicating insights from large datasets is becoming increasingly important as our ability to access and generate data continues to grow. Tableau is a data visualization software tool that can be used to explore and understand your data. In this presentation, we will discuss the basics to getting started with Tableau, how I've used Tableau to visualize COVID-19 surveillance data, and some of Tableau's limitations.
