

MHRI-GHUCCTS Monthly Statistical Seminar Series 2024-2025

Friday, November 15, 2024
12 - 1 PM EST | Online

Missing Data

Missing data presents a potential threat to study validity. In this session, we will consider assumptions about missingness: missing completely at random (MCAR), missing at random (MAR) and not missing at random (NMAR) and how these determine methods for multiple imputation of missing values. Discussion includes older methods of imputation that are less used but may be appropriate in some situations.
