

# MHRI-GHUCCTS Monthly Statistical Seminar Series 2020-2021

Friday November 20, 2020  
12 - 1 PM EST | Online

## Regression Models

**Paul Kolm, PhD**

Associate Director, Department of Biostatistics and  
Biomedical Informatics, MedStar Health Research Institute

Many of the methods for developing multivariable regression models that commonly appear in the research literature are not valid. More recent methods such as elastic-net and random forests avoid the problems of older methods and accommodate assessment of a large number of variables that potentially predict or are associated with the outcome of interest. In this session, we will review both older and more recent methods for developing multivariable regression models.
