

Responsible Conduct of Research GHUCCTS Workshop Syllabus

Workshop Series Coordinators:

Dr. Kathryn Sandberg Director, Translational Biomedical Science Training Program Co-Director, KL2 Scholars Program sandberg@georgetown.edu

Dr. Dexter Lee Co-Director, Translational Biomedical Science Training Program Co-Director, KL2 Scholars Program dllee@howard.edu

Dr. Jason Umans
Director, KL2 Scholars Program
Co-Director, Translational Biomedical Science Training Program
jgu@georgetown.edu

Emily Bujold, MPS Associate Director, TL1 Program eab159@georgetown.edu

Goal:

To provide face-to-face training for predoctoral students, postdoctoral fellows and early career investigators in the responsible conduct of research in order to promote ethical, rigorous and reproducible science. The following in person series dovetails to required CITI modules and provides an opportunity for investigators to discuss all aspects of these topics with an expert in the field. This series also fulfills the requirements of multiple funding agencies.

Tracking of your RCR Education

Participation in these sessions will be tracked and you will receive certification of attendance for individual sessions. Certification, however, will not be provided if you are late or leave early. You will also need to complete the RCR course, Good Laboratory Practice (GLP) and Good Clinical Practice Course (US FDA Focus), HIPAA and Human Subjects on CITI Program.

Workshop Location

Workshops are held via Zoom on Thursdays from 5:30-7:30 PM. See schedule to determine location. You will be notified by email the week before with the link to the Zoom session. Please make yourself comfortable with using Zoom beforehand.

Date	Responsible Conduct of Research Topic
April 7, 2022 5:30-7:30pm	RCR: Authorship and Publication Juan M. Saavedra, MD Adjunct Professor of Pharmacology Georgetown University
	Goal: This session will focus on differing views of what constitutes authorship and who should decide authorship. Also covered is how one can minimize conflicts at the outset and how to manage them once they arise.
April 14, 2022 5:30-7:30pm	RCR: Research misconduct and policies for handling misconduct Robert C. Speth, PhD Nova Southeastern University
	Goal: This session will cover the diverse forms of scientific misconduct and discuss methods for promoting the ethical and professional principles to ensure scientific integrity, spotting misconduct, appropriate responses to misconduct and understanding the grave consequences to the environment, society and the individual that scientific misconduct imposes. Also covered is the scientist's responsibility to society.
May 5, 2022 5:30-7:30 pm	RCR: Dealing with Industry Guest speaker: TBD
3.30 7.30 pm	Goal: This workshop focuses on various types of academic-industry partnerships, unique issues and challenges that arise from these relationships and how to manage potential conflicts of interest.
May 26, 2022 5:30-7:30 pm	RCR: Mentorship Jason Umans, MD, PhD & Dexter Lee, PhD Georgetown University, MedStar Howard University Goal: This workshop will discuss mentorship from the perspective of both the mentor(s) and mentee. Topics include the how to maximize the mentorship experience and how to address problems should they emerge and includes the responsibilities and relationships of all the players in the mentoring relationship.
June 2, 2022 5:30-7:30pm	RCR: Use of Human Subjects Shaunagh Browning DNP, RN, FNP-BC, CRN-BC Georgetown University
	Goal: This session will help you understand the rationale for the requirements and regulations concerning human subject research. You will also learn how to write an effective IRB application.
