

Clinical and Translational Research Grand Rounds:  
**"Using Medical-Legal Partnerships for Violence Prevention:  
Preliminary Data and Lessons Learned"**

**Speaker: Erin Carlyle Hall, MD, MPH**

Erin Hall, MD, MPH, a practicing trauma surgeon and intensivist, is Associate Professor of Surgery at Georgetown and medical director of the MedStar Washington Hospital Center Community Violence Intervention Program. Her local and national research, much of it supported by grants from DC and Maryland, has focused on elucidating disparities in surgical outcomes, on redefining and assessing outcomes of trauma care, and on the collaborative design, implementation and evaluation of patient-centered yet scalable approaches to improve long term outcomes for trauma survivors and leverage trauma as an entry point to better health for this understudied, underserved, and vulnerable patient population. Her talk will describe her ongoing, discipline-spanning, translational and potentially transformative research on how medical-legal partnerships might integrate with hospital-based violence intervention programs to improve outcomes.

**Friday, March 8, 2024**

**Presentation: 12noon – 1pm**

**Live Stream Link: <https://georgetown.zoom.us/j/527229623>**

Clinical and Translational Research Grand Rounds are sponsored by the Georgetown-Howard Universities Center for Clinical and Translational Science (GHUCCTS) and its partner institutions (Georgetown and Howard Universities, MedStar Health Research Institute, the Washington DC VAMC, and Oak Ridge National Lab) to bring together our diverse clinical and research communities to share research that spans disciplines and stages of translation to improve individual and community health.
