

Clinical and Translational Research Grand Rounds:

" Triglyceride-rich lipoproteins: New advances in diagnostics and therapies"

Speaker: Alan T Remaley MD, PhD

Dr. Remaley is Senior Investigator and Section Chief of the Lipoprotein Metabolism laboratory in the Cardiovascular and Pulmonary Branch of the NHLBI. He joined the NIH following his medical, graduate and clinical training in 1990 and has built a multifaceted clinical and translational research program focused on better understanding lipoprotein metabolism and disease mechanisms in humans, in patients with rare diseases and in understudied populations and to translate new insights from basic biochemistry, cell biology, and transgenic animal models into new approaches to diagnose, prevent, and treat cardiovascular disease.

He draws on these multiple translational approaches to address clinical needs in his talk today focused on triglyceride-rich lipoproteins.

Friday, March 10, 2023 Presentation: 12noon – 1pm

This month's talk will take place on the second Friday in January and will only be streamed online.

Research Grand Rounds are sponsored by the Georgetown-Howard Universities Center for Clinical and Translational Science (GHUCCTS) and MedStar Health Research Institute to bring together our diverse clinical and research communities to share research that spans disciplines and stages of translation to improve individual and community health.
